

WE BRING YOUR RENTAL LISTINGS TO LIFE

Virtual 3D tours create an
Always-Open House

Did you know that most prospective tenants start their property searches online? While they may be looking for a place around the block, it may also be across the country! Property Frameworks gives prospective tenants just what they're looking for. Here's how we bring our listings to life and stand out above the rest:

1 Digital Online Advertising

Having an extensive reach into the digital rental market and all the ways tenants target properties online is key to filling vacancies. Property Frameworks markets and features properties on all the major rental sites such as Coldwellbanker.com, PropertyFrameworks.com, Realtor.com, Zillow, Trulia and many others. We optimize listings so that they are accurate and easily viewed on mobile devices as well as desktop.

2 Virtual 3D Tours

Time is money and everyone is looking to make the most of both. With 3D virtual tours, it's an always open house. Our interactive technology allows renters to picture themselves in their new home and explore the neighborhoods and surroundings at their convenience. Online applications also make it simple for potential renters to start the process from any place and anytime, from their mobile devices, laptops or desktops, giving prospective tenants an opportunity to get a jump start on the best properties.

3 24/7 Viewing

It doesn't matter whether a prospective tenant is at work, at home or thousands of miles away, with Property Frameworks interactive technology, anyone can find their dream property, any time. HD photos, Virtual Reality tours and detailed floor plans bridge the gap between your prospective tenant viewing a possible home to viewing their future home.
